DETAILED ACTION

Examiner acknowledges receipt of response to election requirement filed 10/19/06 and IDS filed 10/23/06. Claims 1-85 are pending.

Election/Restrictions

1. Applicant's election with traverse of Group III, claims 28-30, 38-44, 46-49 and 52-54 in the reply filed on 10/19/06 is acknowledged. The traversal is on the ground(s) that a combined search of five groups does not impose undue burden on the examiner. This is not found persuasive because the polymer of Group III can be made by materially different process from the processes of Groups I and II and the polymer of Group III differs from the polymer of Group IV and the compound of Group V as has been previously stated. Therefore, restriction/election requirement is still deemed proper and is therefore made FINAL.

Therefore, claims 1-27, 31-37, 45, 50, 51 and 55-85 are withdrawn from consideration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1618

3. Claims 28-30, 38-44, 46-49 and 52-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Harris et al. (US 5,672,662).

The elected species is pegylated ortho ester.

Harris discloses preparation of pegylated polymers in which the PEG has molecular weight of 3400, 3350 (at least Examples 8-11); the pegylated esters are end protected with methoxy groups (abstract). The molecular weight of the PEG meets claims 46-48. The pegylated ester product meets claims 28-30. The PEG component meets claims 38-40 and the protection with the methoxy group meets claim 41-44. Thus Harris meets the designated claims.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
